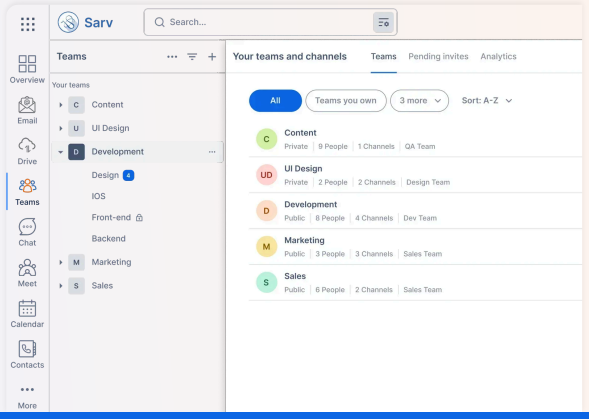
Sarv Teams

Powerful Team Collaboration for a Smarter Workspace

Sarv Teams is your centralized solution for secure, organized & productive team collaboration. Designed for businesses of all sizes, it enables real-time communication, structured discussions & efficient teamwork.

Get Started



Create High-Performance Team Workspaces

Boost productivity by creating focused digital spaces for every business function.

Launch Dedicated Team Workspaces

Create specific virtual spaces for departments, projects, or goals—each with tailored access, ensuring only the right members collaborate on the right work.

Assign Role-Based Access

Manage team permissions using predefined roles. This ensures data privacy, clarity of responsibility, and efficient collaboration.

Flexible Team Joining Options

Invite users with secure codes, allow public team discovery, or enable moderated requests—perfect for secure onboarding across remote or hybrid teams.

Organize Conversations with Clear Structure

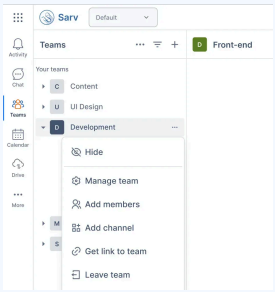
Keep team communication focused and easy to navigate with structured messaging channels.

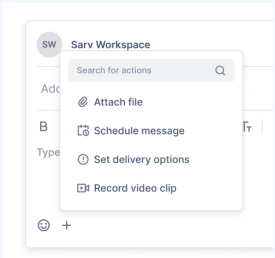
Use Organized, Topic-Based Channels

Segment discussions by project, department, or theme using standard, private, or shared channels, so everyone knows where to go for what.

Threaded Messaging for Clarity

Custom Team Notifications





Smarter Messaging for Productive Communication

Share your files easily with friends, colleagues, and clients, both within and outside the Sarv Drive platform.

Send Smart, Scheduled Messages

Schedule communications for optimal timing, mark important messages as urgent, or attach files and send video notes to boost clarity and response rates.

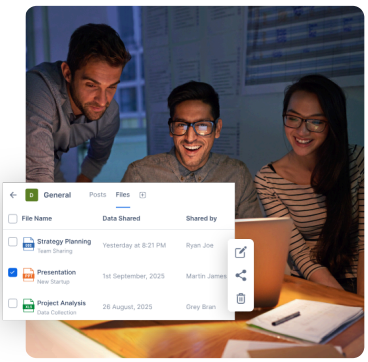
Share Rich Media Instantly

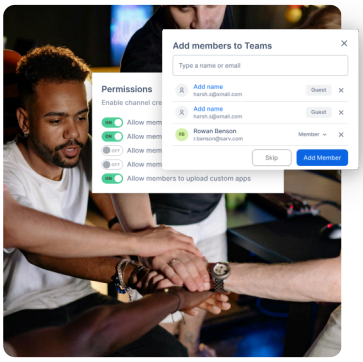
Collaborate on Documents in Real Time

Work on shared files directly inside your workspace without switching apps.

Integrated Document Editing
Open, create, and co-edit documents directly within your team space. Real-time changes and shared context mean faster, aligned execution.

Centralized File Storage & Sharing
Upload, access, and preview shared files within team channels and threads—making it easy to track versions, manage content, and speed up workflows.





Secure & Flexible Collaboration Control

Ensure secure teamwork with advanced role management and joining options

Role-Based Permissions Management
Control access to teams, messages, and files by assigning roles. Prevent information overload and enhance accountability with granular permission settings

Secure Joining & Discovery Options
Let people join via private invite links, browse open teams, or request access via admin moderation. Your teams grow securely, at

Need more help?

Find the answers you need

1. How is Sarv Teams different from other team communication tools?

Unlike traditional messaging apps, Sarv Teams offers:

- Threaded conversations for topic clarity
- Role-based access for secure collaboration
- Built-in document editing
- Seamless integration with email, chat, video meetings, and drive

It's also hosted in India and built for local compliance, making it ideal for regulated sectors.

2. Can I create private teams and channels?

3. Is my data secure in Teams within Workspace?

4. Can I edit documents within my Teams workspace?

5. For what kind of organizations Sarv Teams is designed for?

6. How do I invite my team members to Teams?

7. What tools are integrated with Teams?

8. Is there any mobile version of Sarv Teams?

9. Can I migrate my existing team data to Teams?
